

Shanghai Jiao Tong University, Shanghai, China, 14-15 April 2010

Professor David Gross
*Kavli Institute for Theoretical Physics,
University of California, Santa Barbara, United States*

General Lecture

The Future of Physics

Professor David Gross will discuss 25 questions that define the frontiers of physics and that might guide physics over the next 25 years. These questions address physics in the broadest sense from cosmology, to elementary particle physics, to the physics of quantum matter, to biophysics and the understanding of the mind.
